Mr. Steven H. Gunderson
Rocky Flats Cleanup Agreement Project Coordinator
Colorado Department of Public Health and Environment
4300 Cherry Creek Drive South
Denver, Colorado 80246-1530

Dear Mr. Gunderson:

Please find enclosed a sketch of the intended new entry to Building 881. As part of the Rocky Flats Cleanup Agreement (RFCA) consultative process, this letter provides notification of a proposed project at Building 881. Building 881 is currently working under the Component Removal Rocky Flat Cleanup Agreement Standard Operating Protocol (RSOP) for Facilities Disposition. This project will create an opening in the lower level of the facility to allow removal of large components from the building.

The scope of this effort will include excavating soil from the southwest corner of Building 881 and creating an opening through the foundation into Room 11. The planned excavation is 20 feet deep, 80 feet long, and 100 feet wide. Soil removed during the project will require sampling prior to disposition. Concrete from the building foundation will be surveyed prior to removal and dispositioned according to the results.

Within the excavation area there is a process waste line that transferred liquid waste from the Building 887 Resource Conservation and Recovery Act tanks, through Building 881, to the valve vault. There are no known leaks from this line; however, the soil in the area will be sampled and characterized. The process waste line will be removed and disposed of as a low-level hazardous waste. Removal of the process waste system, including this line, was previously approved through another RSOP Notice.

There were two Individual Hazardous Substance Sites in the area of the excavation. One has been closed and the other is for all underground process waste lines on the Rocky Flats Environmental Technology Site. The enclosed drawing provides a general outline of the area. If you have any questions, do not hesitate to call Steve Tower at (303) 966-2133.

Sincerely,

Richard J. DiSalvo
Acting Assistant Manager
for Environment and Stewardship
